Mission

The Building Commission, as required by Article 3.7 of the Town By-Laws, participates in the selection of design consultants, reviews and approves plans and specifications, receives proposals, awards contracts, and oversees the Town's building program. The Building Commission works closely with the Board of Selectmen, using departments and all regulatory agencies.

There are five members of the Building Commission all of whom are appointed by the Board of Selectmen. The members include a registered architect, a registered engineer, an attorney, a licensed builder and a developer. There are two staff people who serve as agents of the Commission and who administer projects. These individuals are the Town's day-to-day representatives for the work and coordinate with various town agencies for study, design, construction and renovations to public buildings.
